

Concentric Corporation Expands Offerings, Grows

For more than 5 years, Concentric Corporation has been offering clients Information Technology solutions in the areas of Project Consulting, Staffing Solutions and Managed Services. "Our focus has always been to serve our clients with their Information Technology needs. We will continue to provide our clients with the same high quality of service that they are accustomed to receiving from us, however, we have now expanded our staffing solutions to include industries outside of Information Technology", says Andy Hawkins, Director of Sales at Concentric Corporation. These additional specialized industries include the areas of Financial Planners, Insurance Advisors, Legal Professionals and Recruiting Personnel. Division Director Melissa Adams added, "Our clients are excited to hear that we can now offer staffing solutions in these areas, taking the same care and attention in our recruiting process that Concentric Corporation has always been known for." Adams owned and managed her own firm prior to joining Concentric Corporation in 2009.
